■ PROFESSIONAL SUMMARY

Detail-oriented Data Analyst and Bachelor of Computer Applications candidate with hands-on experience in business intelligence, data cleaning, and dashboard development. Skilled at transforming raw datasets into actionable insights using SQL, Advanced Excel, and Power BI, and at applying programming fundamentals in Java and data structures to strengthen reporting and database workflows. Currently completing the IBM SkillsBuild Virtual Internship in Data Analytics with Generative AI. Seeking to apply strong analytical thinking and problem-solving skills to drive data-informed decisions as a Data Analyst or Data Science Intern.

■ PROFESSIONAL EXPERIENCE

IBM SkillsBuild Virtual Internship – Data Analytics with Generative AI

IBM SkillsBuild • Remote | 2026 – Present (Ongoing)

- Completing a structured virtual internship program covering data analytics workflows enhanced by generative AI tools.
- Completed the course “Supercharge Your Data Analytics with Generative AI,” applying GenAI techniques to data cleaning, analysis, and reporting tasks.
- Building practical experience in applying AI-assisted analytics methods alongside traditional BI tools such as Power BI and SQL.

Freelance Data & Technical Specialist

Self-Employed • Navi Mumbai, India | Oct 2025 – Present

- Lead data management and operational reporting initiatives for a diverse client base, applying Advanced Excel for rigorous data cleaning, transformation, and wrangling.
- Develop complex formula automations (XLOOKUP, INDEX MATCH) to optimize data sorting, improve data accuracy, and streamline validation processes.
- Design and deliver interactive business reporting templates and dashboard support systems, enabling clients to track KPIs and identify performance trends.
- Transform raw, unstructured information into organized, visually compelling reports that directly inform clients' strategic decisions.
- Produce high-converting digital marketing materials, technical scripts, and branding assets to communicate technical service value.

■ TECHNICAL PROJECTS

Interactive Business Performance Dashboard

Power BI • Advanced Excel • SQL • Data Visualization

- Architected an interactive business intelligence dashboard to visualize commercial performance metrics and streamline decision-making.
- Extracted, cleaned, and processed raw operational datasets using Power Query and SQL, applying rigorous validation to ensure zero-error reporting.
- Engineered a Power BI interface featuring dynamic charts, KPI cards, slicers, and advanced filters for granular data exploration.
- Enabled rapid identification of revenue trends and operational bottlenecks through automated visualizations, removing manual data processing.

Full-Stack Web Deployment & Brand Strategy

WordPress • XAMPP • MySQL • CSS3 • Branding

- Developed and deployed a localized business web presence and brand identity for an emerging enterprise (Mustakim Fast Food Services).
- Configured a local Apache/MySQL server environment using XAMPP for secure, offline database management and rapid prototyping.
- Installed and customized a WordPress architecture, structuring the relational database for seamless content delivery.
- Delivered end-to-end digital branding, including logo conceptualization and structured technical documentation.

MatchPoint – AI-Powered Resume & Job Description Matcher

Python • Streamlit • Sentence-Transformers • NLP | github.com/arbazmustakimmilkcenter786-afk/MATCHPOINT1

- Built an AI-powered Streamlit application that scores resume-to-job-description alignment using sentence-transformer embeddings and cosine similarity.
- Implemented multi-format resume parsing (PDF via pdfplumber, DOCX via python-docx) with automated match scoring.
- Designed a skill-coverage radar chart and keyword-gap detection to surface missing or underused skills against the target job description.
- Added ATS hygiene checks (filename, contact info, LinkedIn, length, required sections) and session-based score-history tracking with a downloadable report.

■ EDUCATION

Bachelor of Computer Applications (BCA)

Bharati Vidyapeeth (Deemed to be University) • Navi Mumbai, India | Expected 2027

- Relevant coursework: Database Management Systems, Data Structures & Algorithms, Object-Oriented Programming, Web Development, Business Management.

■ CERTIFICATIONS

- **Supercharge Your Data Analytics with Generative AI** – IBM SkillsBuild (Completed August 2026)
- **IBM SkillsBuild Virtual Internship** – Data Analytics track (Ongoing, 2026)

■ TECHNICAL SKILLS

Programming	Java, Advanced Java, SQL, JavaScript, C, HTML5, CSS3
Analytics & BI	Power BI, Advanced Excel (Pivot Tables, XLOOKUP, VLOOKUP, INDEX MATCH, Conditional Formatting), Dashboard Development, Data Visualization, Business Reporting, Trend Analysis
Databases	MySQL, Database Management, Database Queries, Data Validation
Computer Science	Data Structures, Algorithms, OOP, Computer Fundamentals, Debugging
Tools & Platforms	Microsoft Office Suite, VS Code, WordPress, Git

■ CORE COMPETENCIES

Analytical Thinking	Critical Thinking
Problem Solving	Attention to Detail
Communication	Team Collaboration
Time Management	Information Analysis
